FORENSIC AUDIT: CLINICAL CONDUCT & STATUTORY DEVIATION

CURRENT JURISDICTION (NEW YORK)

Subject: Dr. Rebecca Rogers (NPI: 1639185226)

Current Role: Chair of OB/GYN, Albany Medical Center

Academic Role: Director of the Urogynecology Fellowship ("A Teacher of Doctors")

Location: 391 Myrtle Ave, Albany, NY 12208

HISTORICAL CONTEXT & CROSS-REFERENCE (NEW MEXICO)

Note: The subject of this audit is formally identified as the same **Dr. Rebecca G. Rogers** formerly of Albuquerque, New Mexico.

Prior Role: Professor and Associate Chair for Clinical Research, University of New Mexico (UNM) Health Sciences Center.

Prior Location: 2211 Lomas Blvd NE, Albuquerque, NM 87106.

This audit ensures that professional conduct in the "518" region is tethered to the subject's established legacy in the Southwest, preventing a "reputation reset" via geographic transition.

---

1. LEGAL PROTECTIONS (FEDERAL)

Consumer Review Fairness Act (15 U.S.C. § 45b): This document is a protected consumer assessment of medical services. Under federal law, any attempt by a healthcare provider or institution to suppress, penalize, or retaliate against the author of this factual account is a violation of federal statutes.

2. THE DIAGNOSTIC PARADOX

During a consultation witnessed by a medical student, Dr. Rogers explicitly characterized the patient's condition as **"non-structural"** (meaning nothing is physically broken or out of place) yet proposed an **invasive surgical intervention** (major surgery).

This proposal was made to a **nulliparous** (never gave birth) and **celibate** patient with **no history of abnormal Pap smears** (never a "bad" Pap). Despite these significant clinical constraints, Dr. Rogers bypassed all fundamental diagnostic prerequisites; **no bloodwork or urinalysis** was requisitioned to justify the surgical proposal.

3. STATUTORY VIOLATIONS (NEW YORK STATE)

- **NYS Education Law § 6530 (32):** Professional misconduct was evidenced by the physician's failure to maintain a formal clinical record. Dr. Rogers issued only **unsigned, handwritten notes** (scribbles on a scrap of paper) instead of a verified clinical summary.
- **NYS Public Health Law § 2803-c:** Informed consent was rendered impossible. A physician cannot obtain valid consent for surgery while simultaneously bypassing the laboratory data (the basic tests) required to evaluate the necessity and risk of that surgery.

4. PEDAGOGICAL CORRUPTION

As a **Fellowship Director**, Dr. Rogers utilized this session to model a rejection of the **Scientific Method** for a student. This teaches future physicians that surgical proposals may precede empirical data (actual proof), undermining the standard of care for future generations of patients.

5. EVIDENCE VERIFICATION

This audit serves as a companion to the evidentiary dossier archived at:
